EDUCATION

Indian Institute of Technology (BHU) Varanasi
Bachelor of Technology

CGPA - 9.00
2020 – 2024

EXPERIENCE

Software Developer - AQR Capital India Services LLP

July 2024 – Present

- Built **LaaS (Lambda-as-a-Service) reconciliation tools** for pre-trade validation, automating the data checks between internal systems and external providers to proactively flag anomalies.
- Re-architected the **Intraday Instrument load** pipeline by migrating from a stored-procedure-driven to an **API and Event-Driven process**, subscribing to internal messaging signals to process newly added instruments incrementally, resulting in a **10x improvement** in load performance and data freshness.
- Enhanced the Pre-Trade Compliance Portal by introducing a **Caching Mechanism**, reducing external service calls by **50%** and significantly improving response latency.
- Automated generation of multiple post-trade compliance reports by designing a unified reporting framework using the **Factory Pattern**, enabling cron-triggered execution and eliminating manual efforts.
- Developed a UI dashboard enabling business users to **monitor post-trade reports and analytics**, improving operational visibility and reducing dependency on engineering teams by 90%.
- Tech Stack:** Python, C#, AWS, .NET, SQL Server, PostgreSQL, Angular, Git, NUnit, Docker, CI/CD.

Software Engineer Intern - AQR Capital

May 2023 – July 2023

- Contributed to Compliance & Regulatory Reporting Team in post-trade operations.
- Developed a web application to monitor the end-to-end regulatory report generation process using FundApps-Rapptr.

SAAS PRODUCTS

Synaptic AI | synaptica.ai

- Developed a smart assistant that works as a **"Second Brain"** which captures all your online learnings and manages personal notes & tasks.
- Built a **RAG-driven** memory pipeline using a **microservices-based architecture**, embedding user's online learnings & notes to enable semantic retrieval and context-aware responses across sessions.
- Built a real-time **streaming interaction layer** enabling **text and voice conversations** with the AI agent across a Chrome extension and web dashboard, improving user-perceived latency during AI reasoning workflows.
- Achieved 200+ unique users**, with positive feedback on the AI agent's **memory-driven note-taking** experience.
- Tech Stack:** NextJS, Plasmio, NodeJS, Redis, PostgreSQL, Langchain, LangGraph.

Operon | [Walkthrough](#)

- Built an end-to-end **WhatsAppBot-based order management system** enabling local restaurants to automate order placement, status updates, payments, reviews, and analytics.
- Built a chat monitoring interface for vendors to monitor customer conversations, leveraging **Redis-backed state management** to deliver responsive updates and automated messaging.
- Developed a **sales analytics dashboard** integrating MongoDB and Google Sheets to provide business visibility.
- Supported 500+ unique customers** handling **50+ daily orders**, demonstrating scalable real-time automation and workflow management.
- Tech Stack:** NodeJS, Redis, MongoDB, StreamLit.

TECHNICAL SKILLS

Languages & Technologies: Python, Typescript, C#, C++, Java, NodeJS, NextJS, .Net Core, Angular, React.

Tools & Databases: SQL, PostgreSQL, AWS, Redis, Langchain, Langgraph, HuggingFace, MongoDB, Docker, NoSQL.

Other Exposures: OOPS, System Design, OS, SOLID Principles, Networking, Machine Learning, TDD.

CERTIFICATIONS AND ACHIEVEMENTS

- Machine Learning [Specialization](#) & Deep Learning [Specialization](#)**
- Knight Badge** on Leetcode with **1900+** rating & **100+** days streak
- Led the **Tech Team** of Prastuti (12 core members), overseeing end-to-end development from design through deployment, resulting in **200+ downloads** and positive adoption across the IIT BHU community.
